PUBLIC NOTICE

The City of Crandall water system PWSID 1290007 has violated the monitoring and reporting requirements set by Texas commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring period 01/01/2015-03/31/2015

We are taking the following actions to address this issue:

North Texas Municipal Water District treats our public water system before it gets to the City of Crandall. The City of Crandall monitors the disinfectant residual daily at various locations throughout the distribution system. The report of quarterly monitoring due to TCEQ was turned in late. At this time we are mailing out the notice of violation to all of our billed customers and placing this notice on our website [www.crandalltexas.com](http://www.crandalltexas.com) as well as the bulletin board located across from City Hall.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter you may contact, Joe Villarreal, at 972/427-3771.
